
(VOLUME TWO.)

ADDRESSES AND PROCEEDINGS.

Second International Conference
on
State and Local Taxation.

Held at Toronto, Canada, October 6-8, 1908.

Price Two Dollars, postage prepaid, International
Tax Association, Columbus, Ohio.

Ready for distribution before January 1st.

This volume contains a discussion of methods of taxation and assessment, by officials and educators from all parts of the United States and Canada. Problems of administration and the economic effects of legislation are considered from different viewpoints. Many of the speakers are members of State Tax Commissions or local boards; others are economists viewing the problems from a different angle, and still others, speaking for those who pay the taxes, present a side of the question that often does not obtain a hearing.

The discussions following the addresses and reported in the volume, add much to its interest and practical value.

The addresses at this Conference cover a number of subjects that were not fully discussed at the first conference. The present

volume is a valuable addition to the volume of Addresses and Proceedings of the First Conference held at Columbus in 1907. The two volumes represent the latest conclusions of administrators in regard to practical problems, and the best modern economic thought. Officials, students, and taxpayers will find these volumes exceedingly useful.

List of Papers contained in Volume Two.

Scientific Division Between State and Local Taxation.

Professor Isaac A. Loos, School of Political Science, University of Iowa, Iowa City, Ia.

Forest Taxation.

Fred R. Fairchild, Professor of Economics, Yale University, New Haven, Conn.
